

Civil Engineer

We are looking for a team member that will provide exceptional service to our clients, and we have an immediate opening for a Design Engineer within our Utility and Energy Practice Center located in Brookfield, WI or Madison, WI. We will consider mentoring new graduates with a recent degree in civil engineering, or experienced engineers with utility design engineering experience.

Responsibilities for this position include:

- Produce civil engineering designs for site development or redevelopment of energy and utilities, higher education, medical, science and technologies, commercial, hospitality and public facilities.
- Collaboration with other civil engineers, site design professionals, and permitting specialists
- Prepare civil engineering designs, including project plan and specification production, utility system layout and analysis, site grading, erosion control plans and other site related features
- Client Service Management
- Project Management
- Project Scoping and Contracting
- Production of Construction Plans and Specifications
- Basic understanding of wastewater and sewer system engineering design.
- Understanding basic water supply and main system engineering design

Qualifications:

- Bachelor's Degree or equivalent in Civil Engineering or related field
- We prefer a minimum of four (4) years of experience and with expectations that the successful candidate will eventually secure a PE
- Ability to travel as needed for team meetings, client consultations, on-site inspections/visits, etc. Occasional overnight travel may be required
- Working knowledge of AutoCAD Civil 3D, ArcGIS and proficiency with Microsoft Office applications

Preferred Experience:

- Previous experience serving as a design engineer or project manager for multiple city infrastructure projects
- Four (4) years previous experience and registration as a Professional Engineer in the State of Wisconsin
- Ability to develop new business opportunities and win project work
- Previous project management, design and construction administration experience of Civil/Municipal projects including site improvements, streets, drainage and utilities
- Experience in preparing project plans, specifications and bidding documents
- Previous experience in project proposal preparation and client service management
- Previous experience leading a staff of engineering professionals
- Ability to coach and mentor junior level technical staff and Graduate Engineers

We will consider new graduates for mentoring and development to perform assignments for more complex projects.

Please contact Linda Russell at russell@ringdu.com for more information or to submit your qualifications.
