

As a Project Engineer at Ring & DuChateau you will:

- Lead assigned engineering projects in accordance with client specifications and within schedule and budget limitations. Plan, develop, and coordinate engineering projects within a discipline or a number of small projects. Work under general direction from Project Manager and Department Manager with assignments given in terms of overall results expected. Work includes regular client contact and some limited business development.
- Successfully, respectfully and thoroughly communicate with clients, staff and all other parties directly related or tangential to the success of the project and relationships between the parties.

More specifically you will:

- Prepare project specifications and basis of design and design intent, prepare design details, plans and Drawings. Follow instructions in designing, estimating and planning jobs, troubleshoot issues, schedule, supervise and check work of project team members. Coordinate outside contractors when necessary and work closely with other disciplines on multi-discipline projects. Communicate clearly with all stakeholders, understand and resolve issues or refer to project manager for resolution. Monitor costs, quality and budget of assigned projects. Provide engineering support on project where necessary and appropriate.

Your non-project responsibilities will include:

- The coordinating and delegation of work to Engineers, Designers and BIM Technicians and Coordinators. Stay abreast of technical literature and pursue continuing education to remain current in products, processes and materials and assists with preparation of office design standards.

Please contact Linda Russell at l Russell@ringdu.com for more information or to submit your qualifications.
